Municipal Legislation Review

[REDACTED] these are my observations.

[REDACTED]

This province continues to evolve. Should it be an outlying community, major town, major city, minor community, individual area or individual street, this is what I believe. The "property/tax assessment" should never be above/below the Inflation rate (year over year) for the PEOPLE that continue to support those areas. Sure, on the sale of any property within any of those areas, any new "property/tax assessment", can be levied, up or down please.

Stephen Mitchinson
